### Intermediate ESL Activities About Dream Jobs

When it comes to choosing a career, we often have ideas about our dream job. A dream job is a profession that we would love to have because it matches our interests and passions. For many people, a dream job allows them to pursue their hobbies while earning a living. Let's explore some common dream jobs that people often aspire to.

One popular dream job is to become a successful actor or actress. These individuals have a passion for performing and love to be in the limelight. Actors and actresses play various roles in movies, television shows, and theater productions. They use their acting skills to bring characters to life and entertain audiences.

### Beginner ESL Activities About Dream Jobs

Do you have a dream job in mind? A dream job is a job that you would love to have. It is something that you are passionate about and enjoy doing. Dream jobs can be different for everyone. Some people dream of being a doctor and helping people feel better when they are sick. Others dream of being a teacher and inspiring young minds to learn new things. Whatever your dream job is, it is important to work hard and pursue your passions!

One popular dream job is being a chef. Chefs are people who cook delicious food. They work in restaurants, hotels and create new recipes for people to enjoy. Chefs need to be creative and have good cooking skills. They also need to work well under pressure in a fast-paced kitchen.

## Intermediate ESL Activities About Computers

Computers are an important part of our lives today. They are machines that can perform different tasks and help us with many aspects of our daily lives. Computers can be found in schools, offices, and homes all over the world.

One of the most basic functions of a computer is to allow us to communicate with others. We can send emails, chat with friends on social media, and even make video calls with people who are far away. This helps us stay connected and makes it easier to share information.

Another important use of computers is for research. With just a few clicks, we can access a vast amount of information on the internet. This is especially helpful for students who need to find information for their school projects or teachers who want to prepare their lessons. The internet is like a huge library at our fingertips.

**See also [ESL Questions About Music](#)**

Computers are also great for entertainment. We can watch movies, listen to music, and play video games. Many people enjoy using computers to relax and have fun. There are also educational games and programs that can help us learn new things while having fun.

One key word that is important when talking about computers is "hardware". This refers to the physical parts of a computer, such as the monitor, keyboard, and mouse. Without hardware, a computer wouldn't be able to function properly.

Another important term is "software". This refers to the programs, web browsers, and photo editing programs that run on a computer. Software include word processors, web browsers, and photo editing programs. Software is what allows us to perform specific tasks on a computer.

Other useful words related to computers include "download", which means to transfer data from our computer to another computer, and "upload", which means to transfer data to our computer. It refers to the capacity of a computer to store data and programs. Software is what allows us to perform specific tasks on a computer.

Computer storage is an essential concept to understand. It refers to the capacity of a computer to store data. The hard drive is the main device for computer storage, where we can save files and programs. Hard drive is another important word, as it refers to a harmful program that can damage our computer.

Lastly, "password" is a word that everyone should be familiar with when using computers. It is a secret combination of characters that we use to protect our personal information and prevent others from accessing our accounts.

Here is a table with the vocabulary words and their definitions:

Vocabulary Word	Definition
Hardware	The physical parts of a computer
Software	Programs and applications that run on a computer
Download	To transfer data from the internet to a computer
Upload	To transfer data from a computer to the internet
Virus	A harmful program that can damage a computer
Computer Storage	The capacity a computer has to store data
password	The main device for computer storage
secret combination of characters used to protect personal information
